

# Data Sheet

## ConveniCash Payment Station Multi-Denomination Intelligent Cash Handling Machine

Install Front of Store, Under the Counter or Back Office Currency Handling for Customers and Store Associates  
Utilizes Best-of-Breed Currency Recycling, Thermal Printer, Touchscreen, PC and Business Hours enclosure

### Enhanced Functional Features

- Reliable Fujitsu GSR50 bill recycler includes counterfeit and fitness detection/sorting
- Lower profile with all the functionality of more expensive larger units
- On-board optional CPU, printer and touchscreen packaged in attractive business hours enclosure
- Leverages common Fujitsu components used in other solutions
- Fujitsu Control Library SDK middleware

### Benefits

- Rapid ROI, lower cost of ownership and more efficiency managing cash-in-transit program
- Fits under standard counter providing more installation flexibility and lower installation costs
- Provides a market-ready solution for integrators and ISVs allowing them to get to market faster
- Common components ensure lower source pricing that is passed on to customers
- SDK makes integration of partner application software easier and faster, lowering development costs and reducing time to market

# Fujitsu ConveniCash Payment Station Overview

The amount of effort necessary to get payment and currency handling solutions to market can be daunting for some integrators and ISVs. Bending metal and mechanical engineering is not their speciality. It is costly, it takes time, and it diverts precious resources away from what they do best: software applications and services.

Now, with the introduction of the ConveniCash Payment Station from Fujitsu, integrators and ISVs don't have to worry about designing enclosures any more.

Fujitsu has more than 40 years of hardware engineering, component integration and ergonomic design experience to draw on, resulting in extremely efficient man-machine interfaces for devices like ATMs, POS and train and subway payment systems around the world.

Fujitsu has raised the bar by moving their business partners further up the value chain with the ConveniCash Payment Station. At its core, it includes the most flexible and reliable small-format bill recycling unit in the market today, the Fujitsu GSR50.

In the ConveniCash Payment Station enclosure, the GSR50 can be ordered in up to nine (9) different configurations depending on your cash in and cash out requirements, and can be upgraded in the field when your requirements change over time.

In addition to the GSR50, the ConveniCash Payment Station includes standard features like an attractive two-tone steeled cabinet in neutral colors, business hours enclosure and a programmable electronic lock.

Along with the standard features, the ConveniCash Payment Station can be ordered with options like an embedded CPU for intelligence, a 7" touchscreen LCD display for store associate or customer interfacing and an integrated thermal printer for receipts or paper audit trail.

To speed your solution to market and reduce development costs, Fujitsu offers the Software Control Libraries suite of SDK middleware to support more rapid integration of your application software.

To protect your investment, all currency handling components, including the ConveniCash cabinet, business hours enclosure, CPU, touchscreen and printer, are life-cycle managed by Fujitsu's legendary commitment to support and reliability.

The GSR50 Bulk Note Acceptor can be packaged with Fujitsu value-added hardware like a business hours or UL 291 safe, processor and Fujitsu-provided SDK in middleware to facilitate more rapid integration of your application software.

# Fujitsu ConveniCash Payment Station Specifications

<b>Dimensions (W x D x H)</b>	425.45mm x 649.99mm x 781.05mm
<b>Weight (without bills)</b>	Approx. 106kg approx.
<b>Bill Recycler (GSR50)</b>	Configurations available: 1D; 2D 1R +1D; 1R +2D 1R +1L +1D R=Recycling cassette 2R +1L +1D L=Loading cassette 3R +1L +1D D=Deposit cassette 1R +1L +1D +1E E=Exception cassette 2R +1L +1D +1E
<b>Recycle Cassette Capacity</b>	120 Bills per cassette (Approx.)*
<b>Loading Cassette Capacity</b>	500 Bills per cassette (Approx.)*
<b>Deposit Cassette</b>	1,500 Bills per cassette (Approx.)*
<b>Exception Cassette</b>	20 Bills per cassette (Approx.)*
<b>Acceptable Media Range</b>	Maximum (mm) - 85mm x 182mm Minimum (mm) - 62mm x 120mm
<b>Receipt Printer (Optional)</b>	Printing Technology: Thermal Print Speed: 150mm/s Paper Roll Width: 60mm (2.36")
<b>Display (Optional)</b>	Size: 7" TFT; Touch Tech: PCAP; Brightness: 850nit
<b>Processor (Optional)</b>	Technology: NUC 7th Generation Intel Celeron CPU
<b>Electronic Lock (Standard)</b>	6-Digit code safe lock; Rugged stainless steel OLED Screen for easy viewing, user interaction and keypad programming for code changes, additions, and deletions
<b>Electrical Requirements</b>	DC +24V +/- 10% MAX 12.7A
<b>Temperature Operation</b>	5°C to 45°C Stop State: -10°C to 50°C
