

Data Sheet

U-SCAN Verso Belted

Idle lanes Verso active lanes

On average, 50% of POS lanes are closed most of the time. This means that half your front-end investment is not only sitting idle, it is actively working against your best customer experience efforts. Rising labor costs and emerging in-store service models make addressing this issue nonviable until now. U-SCAN Verso Belted allows retailers to turn an idle POS lane into a self-checkout lane in seconds. This means no customer will ever see a closed lane again; only the opportunity to choose how they want to be served. Checkout is the last thing a customer remembers about your store. Why spend all the time and money creating a stellar shopping environment, only to have it forgotten by a negative experience at end?

Key Features

- Converts POS lanes to Self-Checkout lanes in seconds
- Maximizes front-end investment
- Integrated bag-scale security
- Optional SmartCASH™ automated payment module
- S3 Integrations simplify deployment
- Multiple configurations
- Customized to match your corporate branding
- Compatible with all S3 products

U-SCAN Verso Belted improves checkout with no added friction. S3 Integration ensures there is no learning curve for cashiers by presenting your existing POS software.

With our industry-leading U-SCAN self-checkout software, Fujitsu provides the most intuitive user experience in the market today. This makes the experience seamless for current U-SCAN users and simple for new users.

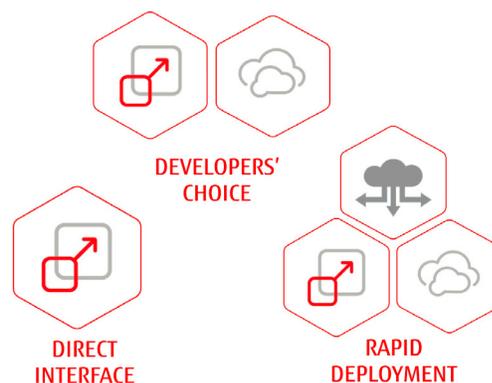

Automated Cash Payment Option

Cash is king, but it is also expensive. Cash also poses a health risk today that should not be ignored. Adding Fujitsu's SmartCASH™ full bank note and coin recycling payment module automates payment in both manned and self-checkout modes. The cashier never needs to touch cash again, while all POS lanes are now full tender in any configuration.

S³ Self Service Simplified

Fujitsu S3 solutions bring unified commerce capabilities directly to the customer's in-store experience. S3 solutions ensure, no matter the touch-point, when a customer chooses self-service, their experience is always familiar, consistent and intuitive. By providing a persistent unified experience, S3 solutions ease the customers learning curve, ensuring high adoption rates while reducing the friction associated with typical disparate in-store technologies.

Unified Commerce Solutions

As part of the S3 line of self-service products, U-SCAN Verso Belted personifies unified commerce hardware solutions. By utilizing S3 software and hardware, Verso Belted becomes a familiar extension of all other in-store self-service solutions.

A common look and feel across all self-service devices ensure your customer always knows what to do. After all, your customers came to shop and pay, not struggle with technology.

S3 solutions not only reduce estate management costs, they reduce interventions to free up labor for more important things, like revenue-generating activities.

S3 Solutions are Self-Service Simplified.

S3 Integration

Fujitsu understands the uniqueness of each retail environment our systems need to integrate into. From legacy software and outdated hardware to the most sophisticated in-house cloud-based applications, U-SCAN Verso is prepared to work with them all. To meet that challenge, S3 Integrations offer 20 years of retail self-service solutions expertise. With three software packages to choose from, no matter the platform, system, or application, integration has never been simpler or more flexible.
