Fujitsu Hybrid Self-Checkout U-SCAN Elite

Why choose ordinary when you can choose Elite?

More than 20 years after transforming retail with the first self-checkout solution, Fujitsu continues its commitment to innovation with our sixth-generation self-checkout device, U-SCAN Elite. U-SCAN Elite signals a change in the concept of self-checkout design. Where these once bulky devices were highly integrated systems with limited options, U-SCAN Elite is designed from the ground up for maximum flexibility in available configurations. With its clean lines and minimalized aesthetic, U-SCAN Elite embodies modernity in any retail environment without intimidating or boring customers. After all, why be ordinary, when you can be Elite?

Key Features

- Smallest footprint of any full capacity recycling SCO on the market
- Industry-leading Fujitsu cash and coin recycling devices
- Designed for a multitude of configurations
- Hybrid configurable for front-end flexibility
- U-Scan software
- A.I. ready
- Common cash devices across all Fujitsu S3 payment solutions

U-SCAN Elite's forward-thinking design ensures that as the speed of change in retail accelerates, U-SCAN Elite can adapt with it. Fujitsu prides itself on maintaining and upgrading the largest fleet of legacy SCO systems in the world, many still in service 20 years later. With no forced upgrades and ongoing support, retailers choose Fujitsu knowing their investment is secure and respected. U-SCAN Elite was purposefully engineered to simplify upgrading and modifying the device well into the future, without sacrificing the build quality that has established our heritage reputation.

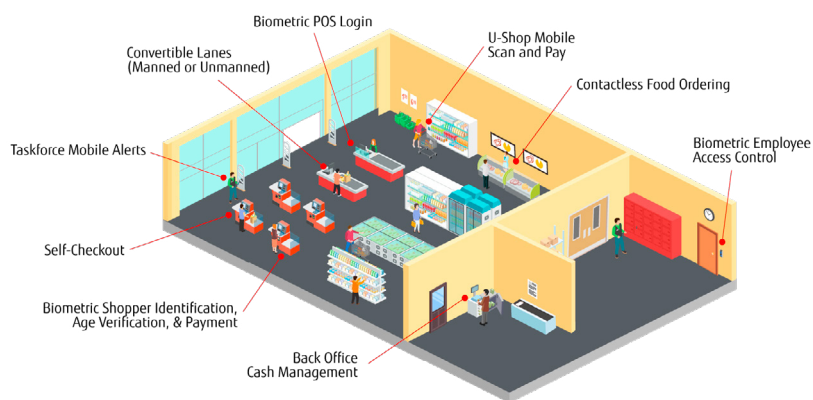

Hybrid SCO Option

U-SCAN Elite provides a hybrid option for those retailers seeking greater front-end flexibility. In hybrid configuration, the side mounted bioptic scanner requires no manual manipulation on the part of the cashier to take control of a lane. Coupled with U-SCAN software, Elite instantly converts between manned and self-service mode at the touch of a button. Flexibility with reliability are the mainstays of U-SCAN Elite.

S³ Self Service Simplified

Fujitsu S3 solutions bring unified commerce capabilities directly to the customer's in-store experience. S3 solutions ensure, no matter the touch-point, when a customer chooses self-service, their experience is always familiar, consistent and intuitive. By providing a persistent unified experience, S3 solutions ease the customers learning curve, ensuring high adoption rates while reducing the friction associated with typical disparate in-store technologies.

Unified Commerce Solutions

As part of the S3 line of self-service products, U-SCAN Elite personifies unified commerce hardware solutions. In utilizing the Fujitsu SmartCASH™ module as its base, U-SCAN Elite allows a retailer to deploy a single common cash recycling platform throughout the retail environment.

A common look and feel across all self-service devices ensure your customer always knows what to do. After all, your customers came to shop and pay, not struggle with technology.

S3 solutions not only reduce estate management costs, they reduce interventions to free up labor for more important things, like revenue-generating activities.

S3 Solutions are Self-Service Simplified.

S3 Integration

Fujitsu understands the uniqueness of each retail environment our systems need to integrate into. From legacy software and outdated hardware to the most sophisticated in-house cloud-based applications, U-SCAN Elite is prepared to work with them all. To meet that challenge, S3 Integrations offer 20 years of retail self-service solutions expertise. With three software packages to choose from, no matter the platform, system, or application, integration has never been simpler or more flexible.

PalmSecure

As part of the S3 line of products, U-SCAN Elite provides for out-of-the box compatibility with all Fujitsu S3 self-service solutions.

U-SCAN Elite Specifications

Dimensions (W x D x H)	520mm x 721mm x 1761mm
Weight (without bills)	170kg Approx.
CPU	Intel 7th Generation Kabylake Core i5-7500T Memory: 8GB Standard memory; expandable to 16GB Storage: 256GB Solid State Drive
Ethernet	1 x 10/100/1000 LAN
Inputs/Outputs	3 x 12 V P-USB 1 x 24 V P-USB On-board Video (VGA) 3 x USB 3.0 Ports
Display	15" Color Touch Screen Projected Capacitive Multi-Touch (10 point Touch) 1024 X 768 Resolution
Scanner Scale	High performance 1D and 2D bar code bioptic scanner (EAS supported) Maximum Static Weight: Up to 300lb / 136 kg depend on model
Printer	High Speed Thermal Printer
Lane Light	White color lane number light Tri-color indicator light
Bill Recycler (GSR50)	Suggested configurations: 2R + 1D R = Recycling cassette D = Deposit cassette 2 Rollers per Recycling cassette, up to 4 denominations
Recycle Cassette Capacity	240 Bills total capacity (Approx.)
Deposit Cassette	1,500 Bills per cassette (Approx.)
Deposit Volume	50 Bills per transaction
Deposit Speed	3 Bill/1 sec. 20 Bills/10 sec.
Dispense Volume	20 Bills per transaction
Dispense Speed	3 Bill/1 sec. 20 Bills/12 sec.
Total Coin Capacity	Up to 8 denominations (Euro) Up to 6 denominations (USD) Capacity: 4,200 Euro / USD mix (Approx.) Single Coin Input Dispense Speed: 4 Coins/sec.
