Retail Self-Service Solution

U-SCAN BOLT™

BOLT™ it and forget about it

Self-Service Anywhere

Today's retail store is a constantly evolving environment of emerging business challenges coupled with increasing operational demands. With Self-Service being called upon to solve these problems, retailers need a system that can adapt as needed. U-SCAN BOLT™ is designed to tackle a retailer's need for flexible solutions that provide easily deployable self-service applications throughout their in-store environment. With Fujitsu, you can simply BOLT it and forget about it.

Key Features

- Multiple mounting configurations simplifies deployment
 - Pedestal, Counter-top
- Unified components reduces TCO while increasing reliability
 - Common with Fujitsu U-SCAN, SCO, Convertible Lanes
- Compatible with all Fujitsu S3 solutions
 - QSS, Self-Checkout, SmartCASH, Verso
 - U-SCAN, TaskForce, Integro, PalmSecure

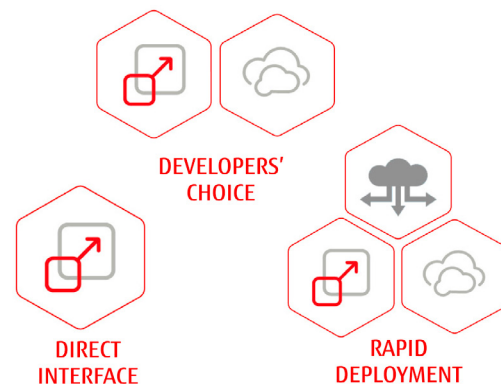

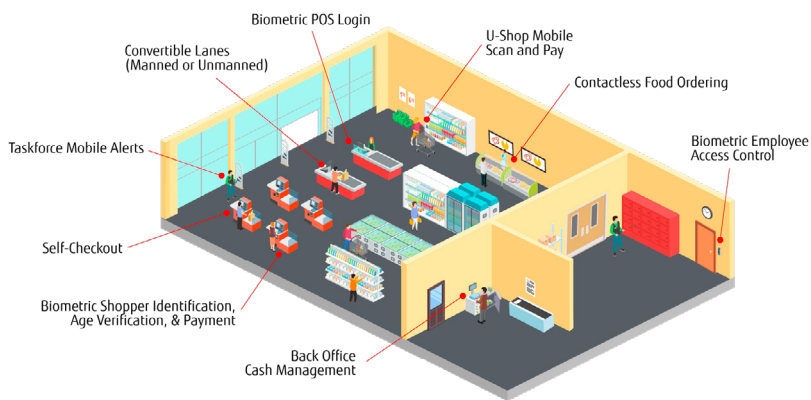

Focus on the Customer Experience

Customers today are choosing retailers who provide the enhanced in-store experiences they are demanding. BOLT's size makes it simple to deploy, allowing a retailer to add self-service solutions anywhere throughout the store. The purposeful minimalist aesthetic blends into existing store decor, ensuring BOLT never looks out of place. No matter the application, BOLT can be relied upon to engage customers at the level of familiarity they are expecting. From the simplest ticket-queuing applications to complex quick-serve solutions, U-SCAN BOLT connects you to your customers.

S³ Self Service Simplified

Fujitsu S3 solutions bring unified commerce capabilities directly to the customer's in-store experience. S3 solutions ensure, no matter the touch-point, when a customer chooses self-service, their experience is always familiar, consistent and intuitive. By providing a persistent unified experience, S3 solutions ease the customers learning curve, ensuring high adoption rates while reducing the friction associated with typical disparate in-store technologies.

Unified Commerce Solutions

As part of the S3 line of self-service products, U-SCAN BOLT personifies unified commerce hardware solutions. The minimalist design and compact size allow retailers to deploy a single common self-service platform throughout the retail environment.

A common look and feel across all self-service devices ensure your customer always knows what to do. After all, your customers came to shop and pay, not struggle with technology.

S3 solutions not only reduce estate management costs, they reduce interventions to free up labor for more important things, like revenue-generating activities.

S3 Solutions are Self-Service Simplified.

S3 Integration

Fujitsu understands the uniqueness of each retail environment our systems need to integrate into. From legacy software and outdated hardware to the most sophisticated in-house cloud-based applications, U-SCAN BOLT is prepared to work with them all. To meet that challenge, S3 Integrations offer 20 years of retail self-service solutions expertise. With three software packages to choose from, no matter the platform, system, or application, integration has never been simpler or more flexible.

As part of the S3 line of products, U-SCAN BOLT provides for out-of-the box compatibility with all Fujitus S3 self-service solutions.
